

Product Features

Professionally developed inner drum and special outer cylinder

All water proof parts are made of high-premium stainless steel, and each inner drum has passed dynamic balance test. Central gravity deviation is less than 30g, which is exquisite and durable.

Specially programmed PLC controller

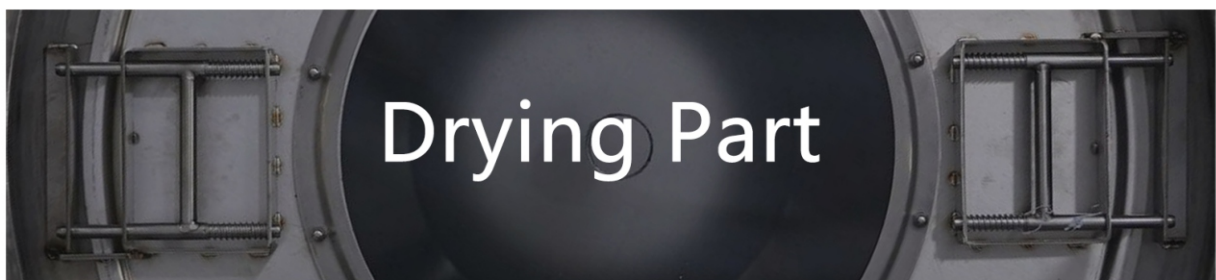

Gamesail self-developed and patented PLC controller is easy to operater. Advanced design philosophy can meet customers' personalized demand.

Tilting Structure

The large-diameter front load and maximum 18° tilting angle can ensure the fast,smooth unloading.

Other

Three inlets, double drain (rear outlet), which is easy to install and recycle. keeping environment clean&tidy.

1.High-power heater (steam/gas/thermal oil), stainless steel heater,fast heating and durable.

2. Special ventilation structure, compact and practical.

3.Special ventilation disconnection structure for smooth unloading.

Models

Tilting Type

- PXH-100

- PXH-130

- PXH-160

The PXH model is combined washer extractor dryer 3 in 1 latex rubber glove machine, mainly for latex product washing drying process.

Due to the development requirements of domestic and global production enterprises, the subsequent washing, vulcanization and drying processes of latex gloves are optimized and transformed. Combining the characteristics of the original fully automatic industrial washing machine and high-efficiency energy-saving dryer, our company's technical staff developed and designed a soaking and drying machine for the production process of latex gloves. This equipment integrates powder washing, rinsing, dehydration, drying, coating spraying, cooling and automatic discharge are integrated.
